Creating a Landing Page using Hub spot

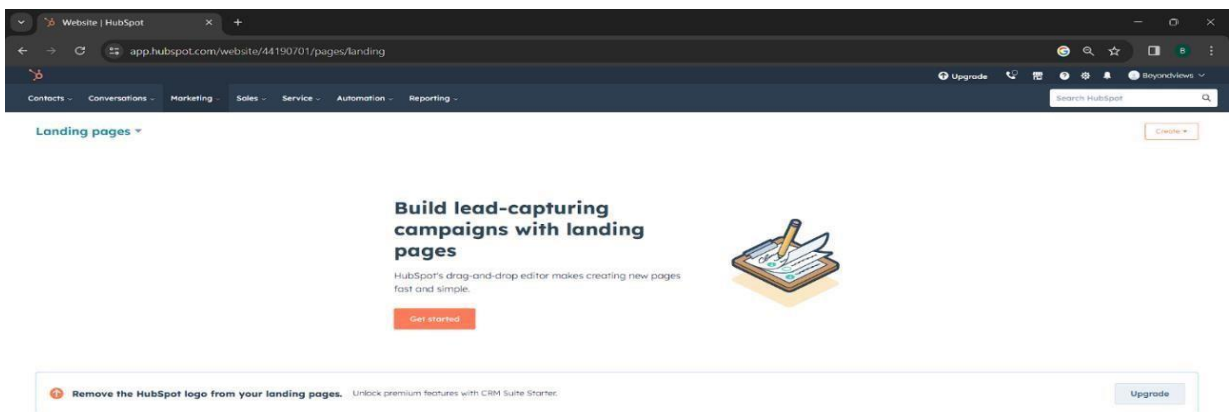

Create a Account with the industry type and job description and ect....

Step 1: Marketing-Landing page

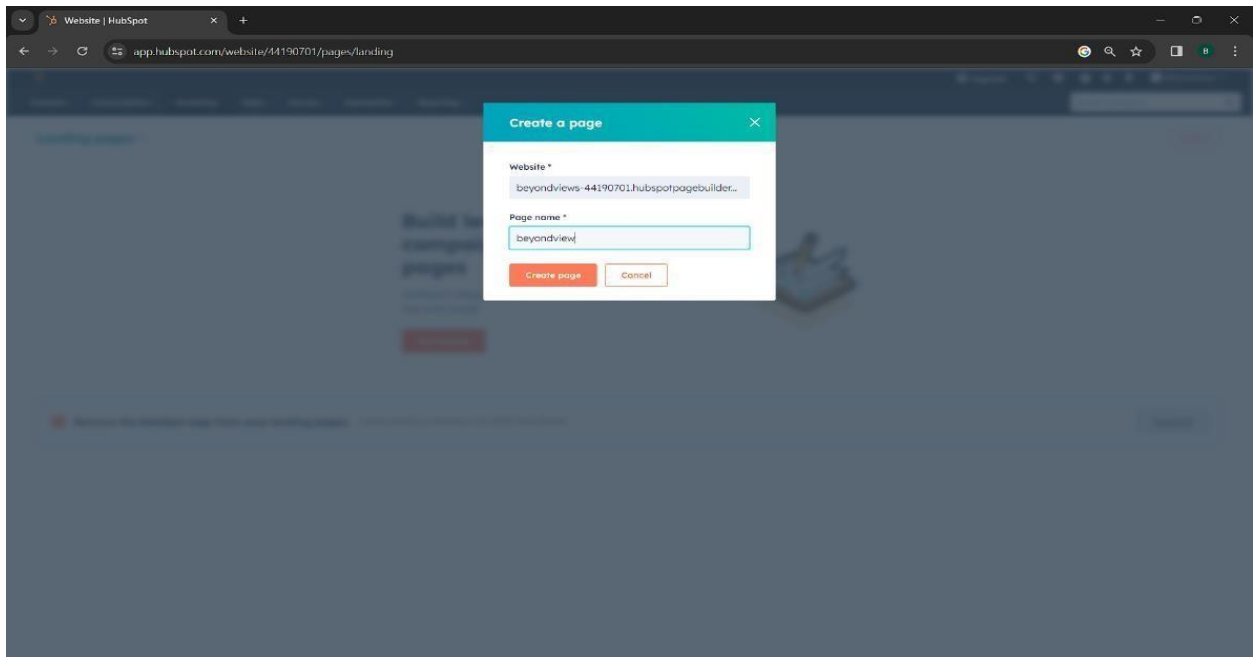

In the marketing field the landing page will be chosen.

Step 2 :Get Started

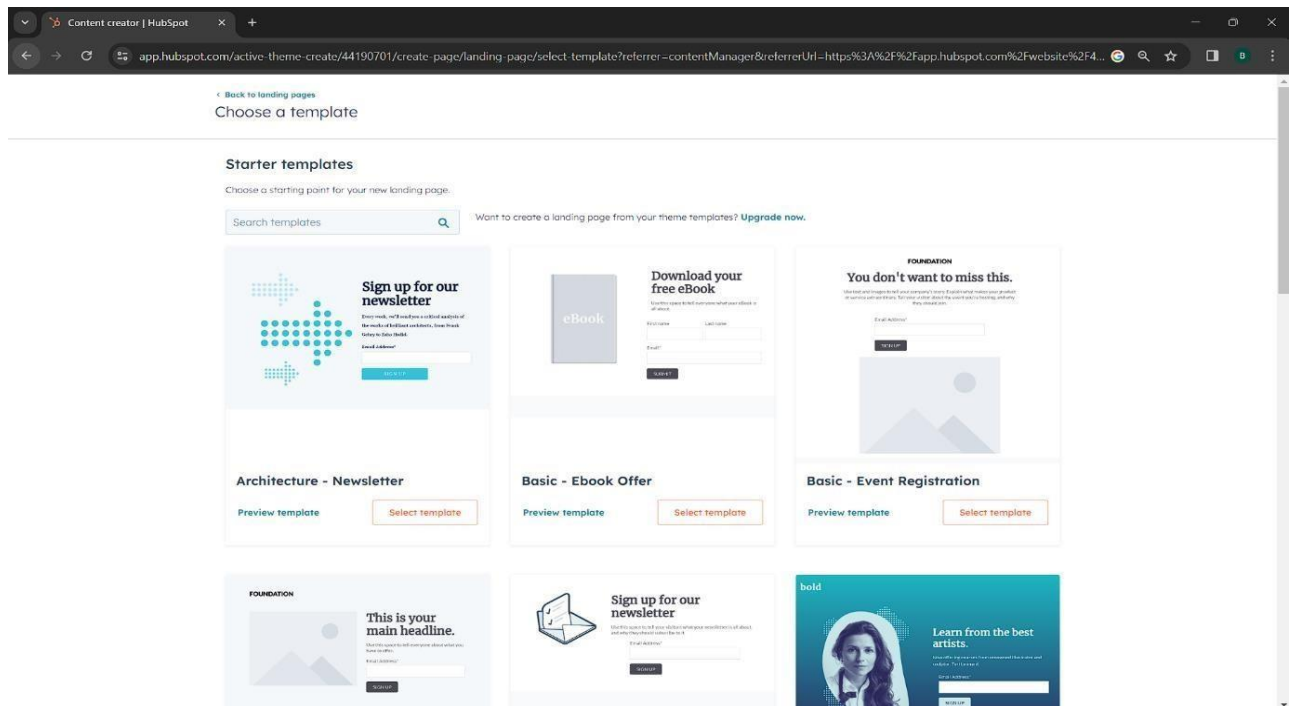

Get started with landing page and create a business to business (b2b) communication.

Step 3: ADD WEBSITE/PAGE NAME

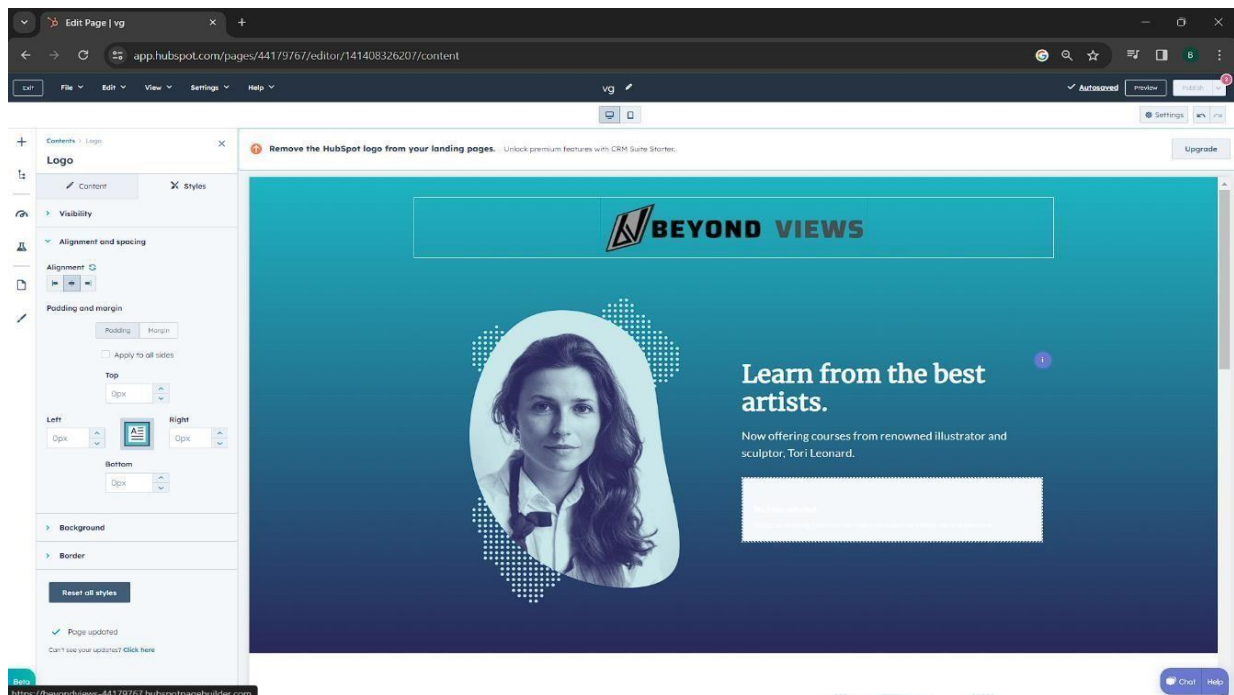

Create a page name relevant to the landing page.

Step 4: TEMPLATE

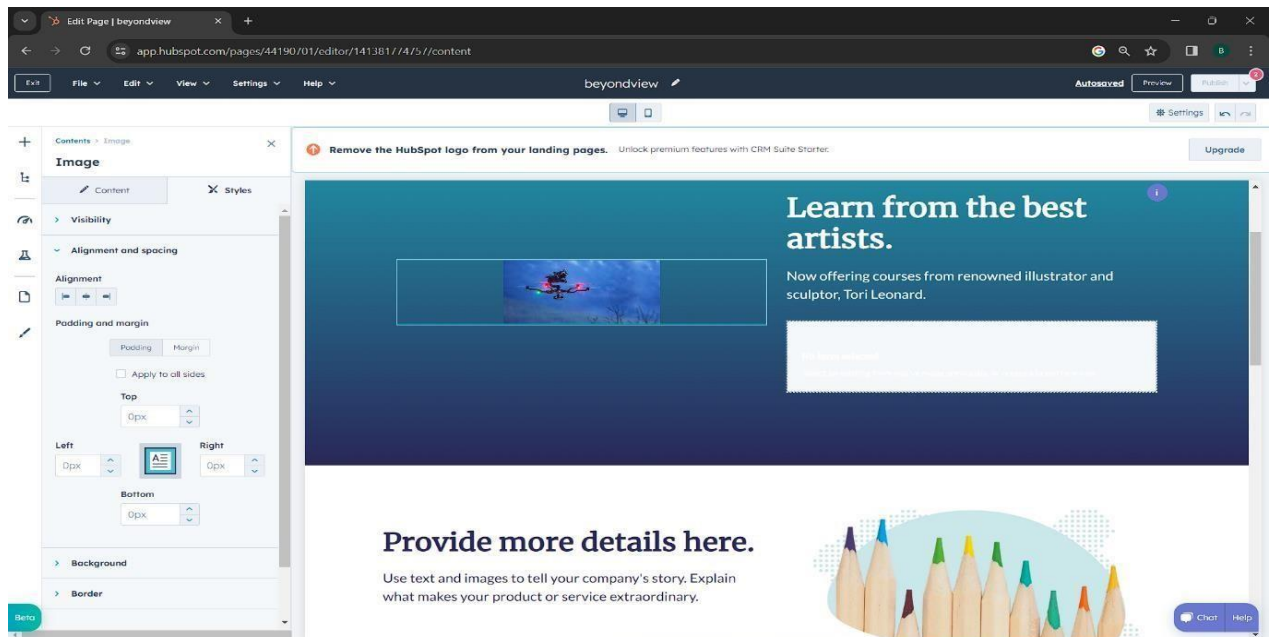

There are several template have been displayed in the page we have to choose the relevant template for our project.

Step 5: LOGO

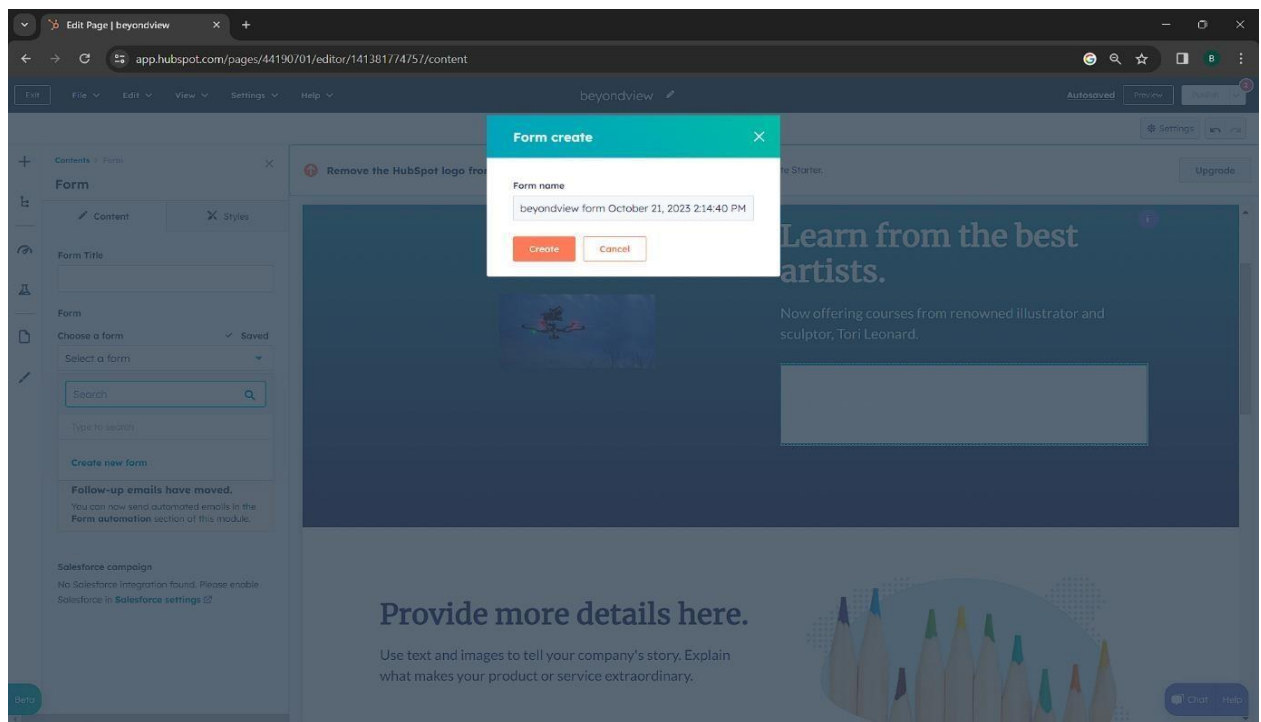

Add logo to the landing pages that you are creating with your own company **Add Content:**

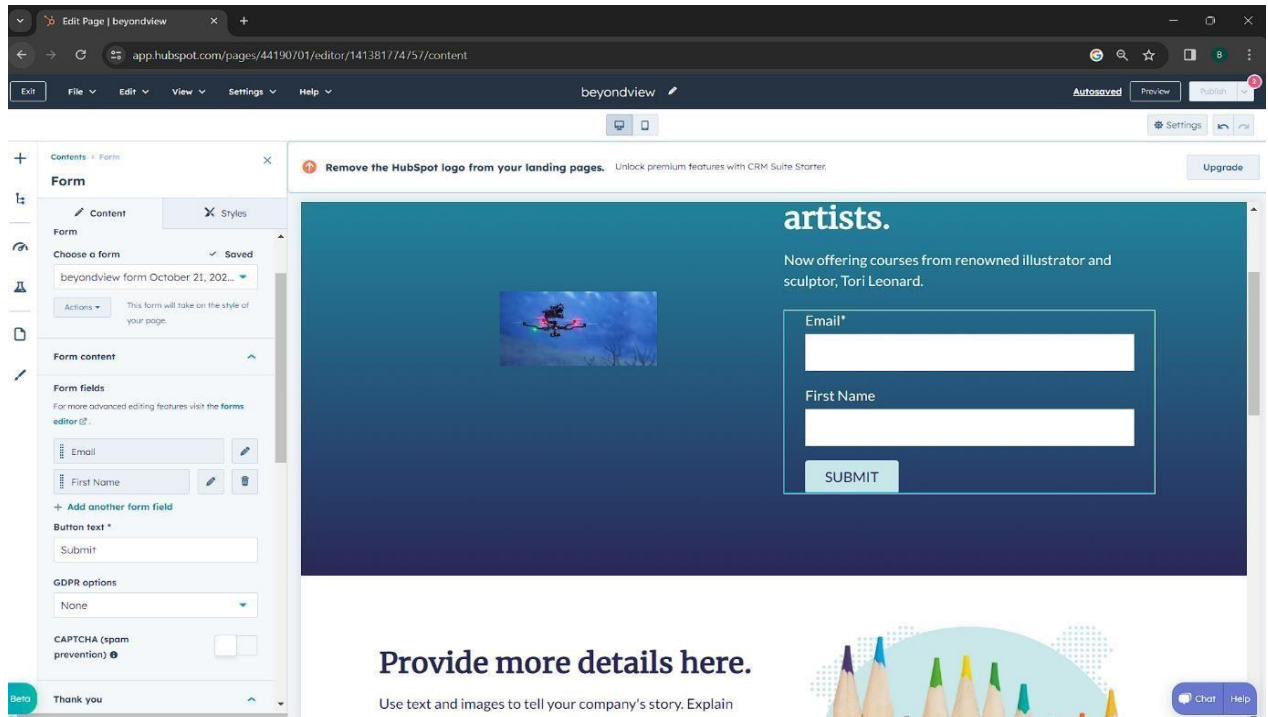

Add content to your landing page like image , title, content and so on.

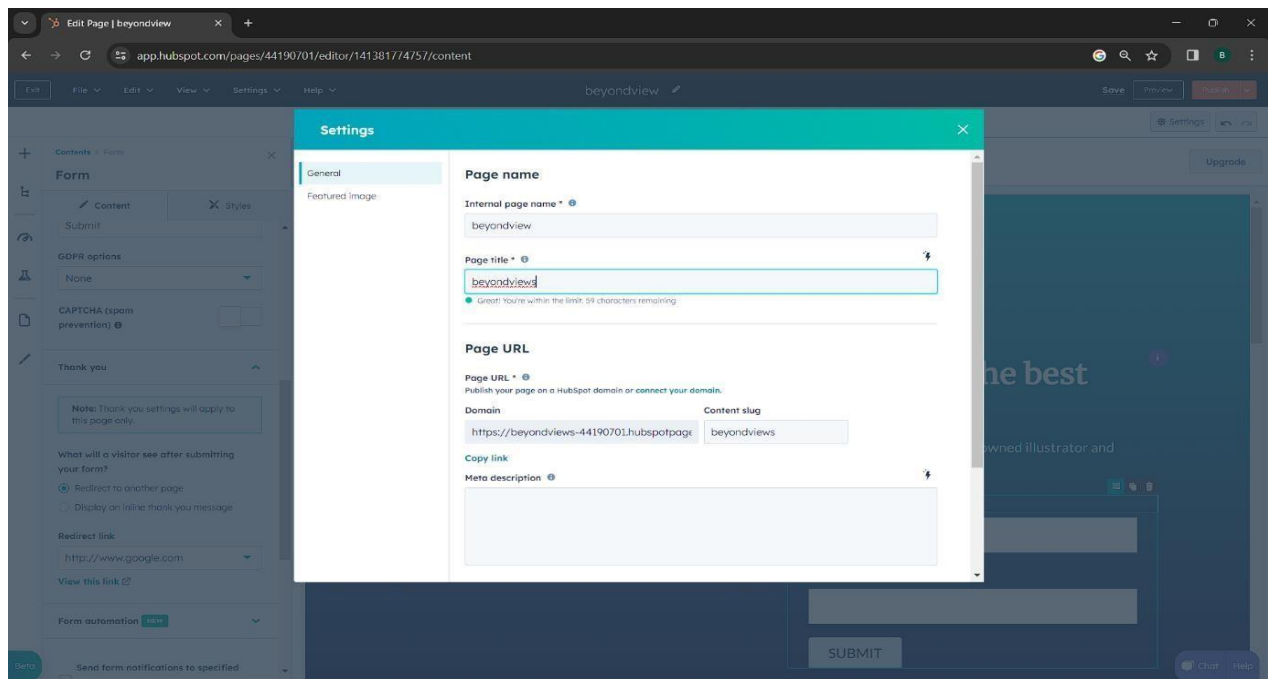

Step 6: SELECT FORM

Create a form that contains a Email, Fist Name and Last name Summit option.

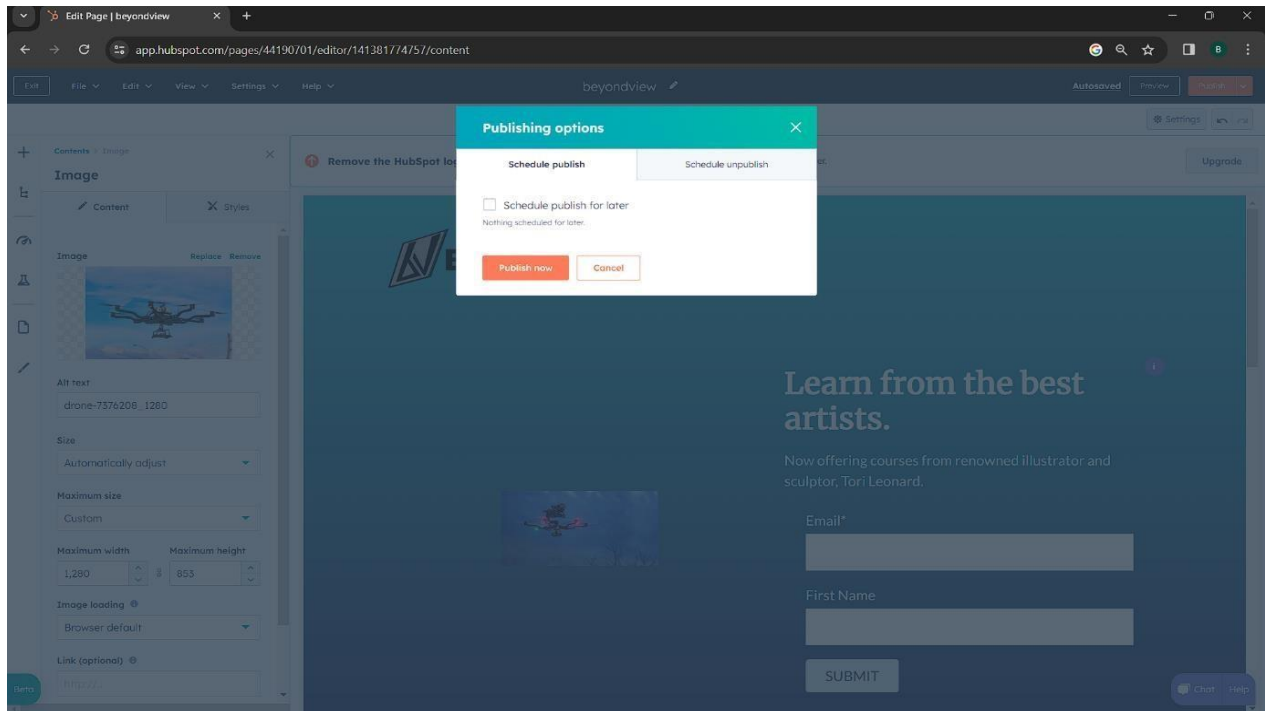

Step 7: PAGE TITLE AND SLUG

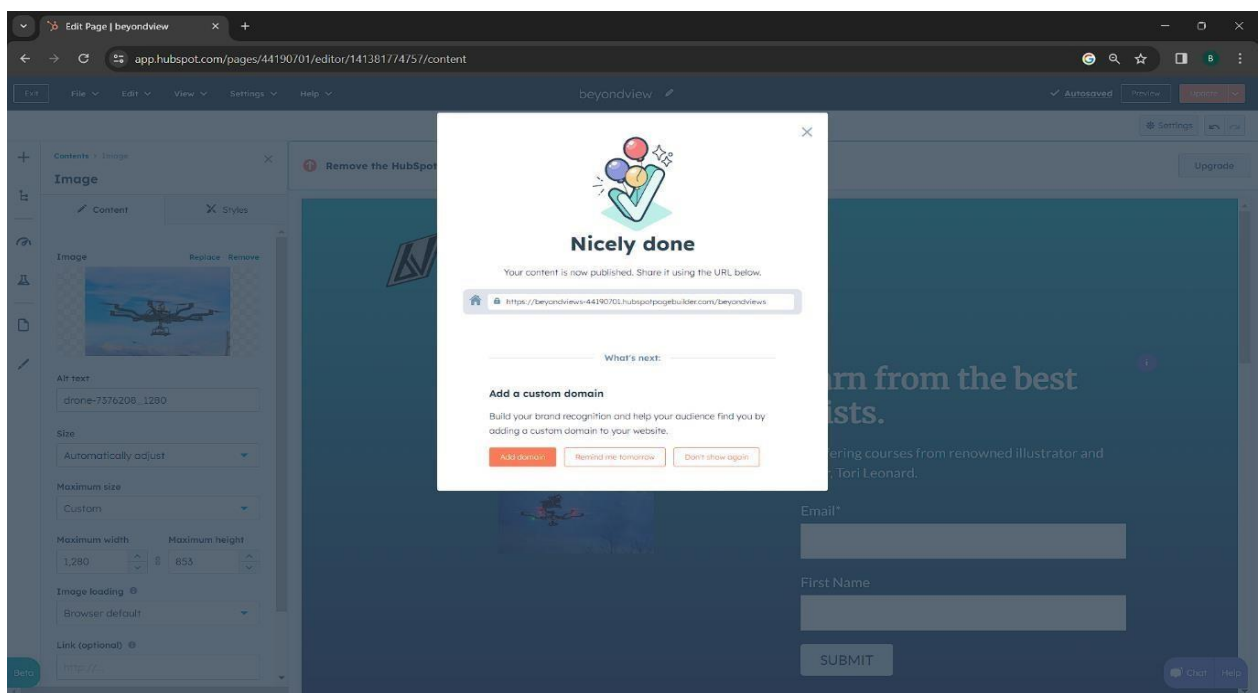

Create a Page Name and Slug for the Page URL .Other wise we can't publish the landing page.

Step 8: PUBLISH

Here the publish option we can schedule the publish based on timing.

URL:

This is the final procedure for creating a landing page with the Hub spot.
